

WORK FROM HOME WITH KIDS AND THRIVE!

Learn Beyond Screens

What are all the ways to amp up off-screen learning ?

Screens are an important way to learn in the 21st century, and likely much of your child's schooling happens in front of a screen. Though screen use can often be passive, it's also a means for productive, creative, high-level learning.

There are varying thought levels involved in screen use.

Ask:

At what level am I thinking?

Passive Entertainment:

watching TV, mindless games, printing pre-made 3D designs, social media scrolling

Active Communication:

texting, participating in online groups, email, online video chats like Zoom/Skype

Active Education:

watching educational videos for application, online course, math online, learning to type, online chess

Creative Education:

coding, design games/products, write poem/story, games like Minecraft that require creation

Learning in 3D

**What's the third dimension?
Meaning.**

The deepest learning
is meaningful learning.
How do learners
create meaning?

- Interests
- Curiosities
- Real-life applications
- Values
- Strengths

Meaningful learning leads
to personal growth.

Brainstorm Your Meaningful Learning, Screenless Activities

- In what ways might I learn by imagining?
- In what ways might I learn by experimenting?
- In what ways might I learn by discovering?
- In what ways might I learn by elaborating?
- In what ways might I learn by communicating insights?
